

As a Front-end Developer with over 5 years of experience, I specialize in rapidly shipping features, launching MVPs in days rather than months, and enhancing products, workflows, and team dynamics with a focus on quality and innovation.

Work Experience

Senior Front-end Developer	90 Seconds Singapore	July 2023–Present
<ul style="list-style-type: none">Delivered high-quality, robust production code for a diverse array of clients including VISA, Kyndryl, Typsy, Cisco, Microsoft, Uber, Amazon, PayPal, and Torrens University Australia.Architected a new mobile app using React Native and Android, integrating multiple micro-frontend web apps, resulting in enhanced app performance and user engagement.Enhanced the ordering micro-frontend app for improved functionality and user experience using React, TypeScript, Redux Toolkit, Apollo GraphQL, and REST API.Provided leadership within the engineering department through collaboration, knowledge sharing, mentorship, and daily code reviews, fostering a culture of continuous improvement.Developed E2E tests from scratch with Playwright and unit tests with Jest, significantly increasing test coverage and reliability.Consistently introduced updates to meet and exceed user expectations, leading to improved user satisfaction.Collaborated with designers, project managers, and engineers to transform creative concepts into production realities for clients and stakeholders.Assisted in developing and maintaining technical documentation to ensure best practices.Supported the recruitment process by participating in interviews and onboarding new developers.Spearheaded efforts to optimize application performance, resulting in faster load times and a smoother user experience.		
Senior Front-end Developer	Nomtek Wroclaw, Poland	2 months
<ul style="list-style-type: none">Developed a web app to enhance reading skills using Next.js, TypeScript, and ESLint Airbnb, and integrated CI/CD processes with GitLab and Vercel, improving deployment efficiency.Created a web app for the interview process that utilized phone and webcam recordings to ensure candidate integrity, using Material UI, AWS, Axios, React.js, Styled-Components, Custom Webpack, Cypress, Emotion, Redux, and date-fns, enhancing the interview process.Mentored a Junior Front-end Developer, providing guidance on best practices, code quality, and career development, fostering professional growth.Collaborated closely with cross-functional teams to deliver optimal solutions for client requirements, resulting in high client satisfaction.Ensured the scalability and maintainability of code through best practices and code reviews.Implemented responsive design principles to enhance the user experience across various devices and screen sizes.		
Front-end Developer	Right Information Wroclaw, Poland	4 months
<ul style="list-style-type: none">Launched an online fitness live video app with features like real-time heart rate monitoring, interval timers, and virtual backgrounds, using React.js for the web and Swift/Kotlin for native iOS/Android versions. Proposed solutions during weekly client review calls, resulting in increased user engagement and satisfaction.Developed a complex admin dashboard web app using Vue.js, Vuex, TailwindCSS, and REST API, streamlining administrative tasks.Spearheaded the implementation of new features and functionality, ensuring alignment with business goals and user needs.Engineered a custom graph algorithm for the admin dashboard, enhancing data processing capabilities.		

- Built a private admin dashboard app in React.js for a producer of electro-installation equipment expanding into foreign markets, improving operational efficiency.
- Utilized Agile methodologies to manage and deliver project milestones efficiently.

Front-end Developer

Nomtek
Wroclaw, Poland

2 months

- Collaborated on a Web3 NFT Marketplace startup application, delivering robust front-end solutions using Next.js, TailwindCSS, Jest, and Cypress. Engaged with clients to propose and implement scalable solutions.
- Conducted thorough code reviews to maintain code quality and promote best practices, improving overall codebase quality.
- Contributed to the design and implementation of user interfaces that are both functional and visually appealing, enhancing user engagement.
- Integrated third-party APIs and services to extend the functionality of the application.
- Worked closely with back-end developers to ensure seamless integration and data consistency.

Front-end Developer

90 Seconds
Singapore

3 years

- Developed a comprehensive web app with functionalities including browsing, ordering, account management, and delivery using React.js, TypeScript, GraphQL, Redux, and Jest, resulting in a seamless user experience.
- Constructed a micro-frontend ordering app using React.js, Redux Toolkit, Apollo GraphQL, and StoryBook, improving modularity and scalability.
- Architected the front-end framework for a service ordering web application, including pricing and team editor functionalities, streamlining development processes.
- Created a mobile version of the web app with React Native, focusing initially on delivery functionalities, and increasing mobile user engagement.
- Enhanced performance and user experience through optimization techniques and responsive design principles.
- Initiated a new micro-frontend app for content management, including file uploads, feedback, and editing, improving content management efficiency.
- Participated in multiple developer recruitment processes, contributing to the growth and strength of the development team.
- Contributed to four projects, consistently employing Agile and Scrum methodologies.
- Briefly worked on a video-as-a-service project using Ruby on Rails, enhancing the service's functionality.

Technologies and Languages

- Languages: JavaScript, TypeScript, HTML, CSS, SCSS, PHP
- Technologies: React, Next.js, React Native, Vue, Node, Tailwind, Jest, Playwright, GraphQL
- Other: Git, GitHub, CI/CD, Netlify, Vercel, Heroku, Docker, Webpack, Storybook, AWS, Firebase, Figma

Projects

- **Grammarly Dark** - Developed an open-source dark theme extension for Grammarly on Chrome, Firefox, and Edge; recognized by Softpedia, 200+ Product Hunt votes, 30,000+ users.
- **Darkness** - Contributed to the open-source Darkness extension, adding dark themes for PayPal; part of a project with 100,000+ global users.
- **Content Creation** - Created blogs, videos, photos, guides, and tutorials on web development across Instagram, YouTube, LinkedIn, and Medium; content viewed by 100,000+ users worldwide, helping many learn programming.

Interests

- Web accessibility, web animations, coding challenges, technology meetups, open-source, tech blogging
